Al-Shora Council - 2003 to 2007
MD of Dhofar Tourism Company - 1997 to 2001
Head of Project Section Dhofar Municipality - 1991 to 1996

Chairman's Message

As one of the Oman most successful companies, our corporate journey began in the early 1992s. Today, we remain committed to the same ideals and objectives that have driven our success over the last two and half decades. We are proud of our past and we have an active present and we look forward to a promising future. These values are ingrained into our corporate culture and are followed in every aspect of our business operation through four major tenets: **zero compromise on quality, consistent value for money to our clients, client's satisfaction, and maintaining loyalty with the employees & vendors.**

We are committed to having a good partnership, transparency and reliability with our clients rather than Client-Contractor relationship. Our clients are fully aware that we have the skills, resources and expertise, and most importantly, the ability to complete their projects to the highest standards on time.

Also Health, Safety, Quality and the Environment are the most important concerns of our company and we follow strict safety regimes and strive to continuously improve its performance. We at STC take pride in our achievements which we attribute to the dedication of our staff, whose exceptional skills and expertise are the key value of our company's success. Our loyal team of workers & professionals has always succeeded in proving that we can deliver on our promises, we can rise to the challenge and excel in our performance to the satisfaction of clients.

Last, but by no means least, a warm word of thanks to our own employees: the foundation and pillars of our success, who have shown care and responsibility at every turn and who have enabled us to become, in the space of a few years, one of the leading construction firms in the region. I will end with Bill Bradley quote **"Respect your fellow human being, treat them fairly, disagree with them honestly, enjoy their friendship, explore your thoughts about one another candidly, work together for a common goal and help one another achieve it."**

About Us

Al Salsabeel trad. & Cont. Co. LLC (STC) is one of the most experienced Trading and Contracting firm operating in Oman. It has sustained itself over the last few years as an innovative leader in the Field. STC was established in 1992, by Engineer Ahmed Al Barami as a Private Trading and Contracting firm. We offer Contracting services for commercial, hospitality, office, hospital, residential project and infrastructure projects from early planning and entitlement Phases and design through construction, specialised in all type of services.

We believe that the following leads to a stable and increasing share in the Contracting field, both in Oman and Gulf area:

- Qualified and experienced staff
- Information and Management Systems
- International partners of repute and experience

With this precise combination, and through our management system, our Mission could be achieved to meet our clients' satisfaction through high Quality work, dedication and healthy competition.

Our Philosophy

Our Philosophy and practice are founded in understanding each client's needs and project goal, with commitment to excellence in contracting, service, ecological responsibility and utilization of state-of-the-art design tools and techniques with a hand-on approach. Our employees have a wide range of experience and expertise, along with professional accreditations. We offer a full range of trading and contracting from Concept to commissioning to a wide spectrum.

Vision

To be a top class Trading and Contracting firm committed to quality, timely completion, customers satisfaction, continuous improving the position of our company.

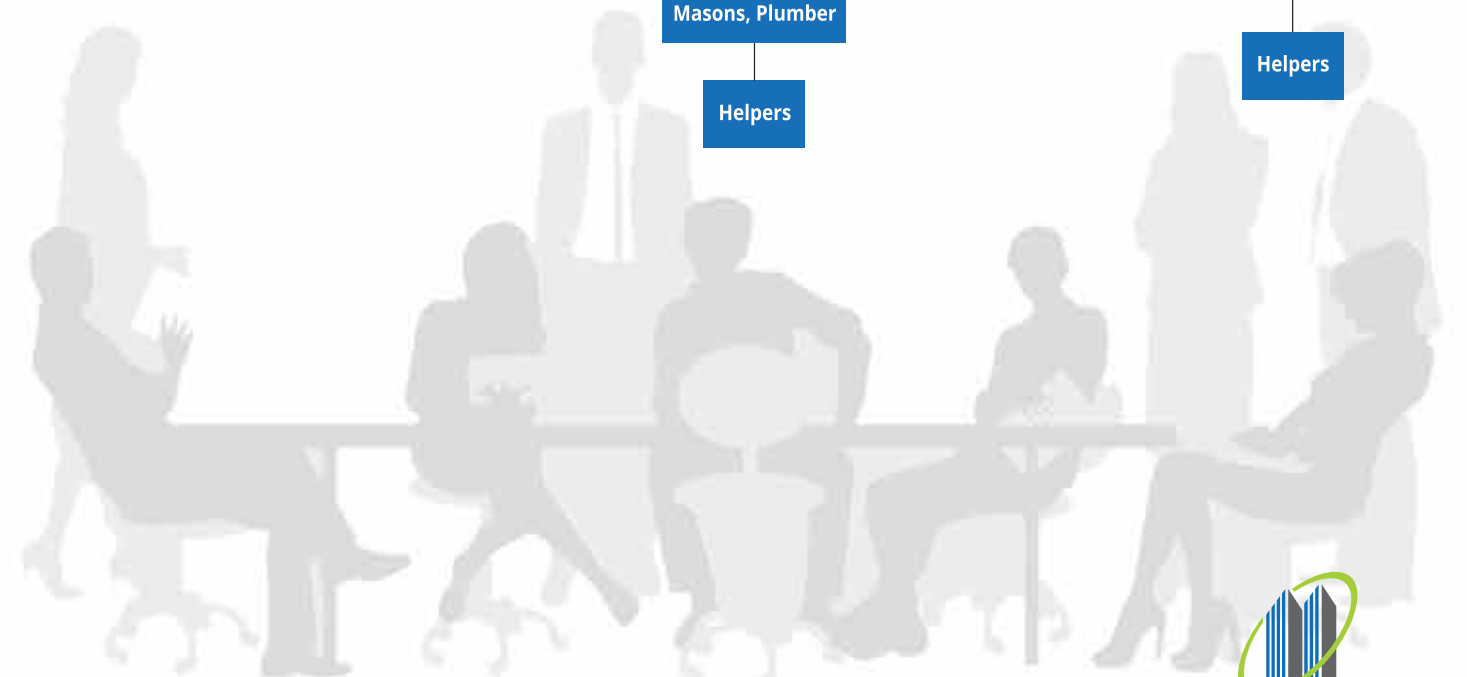

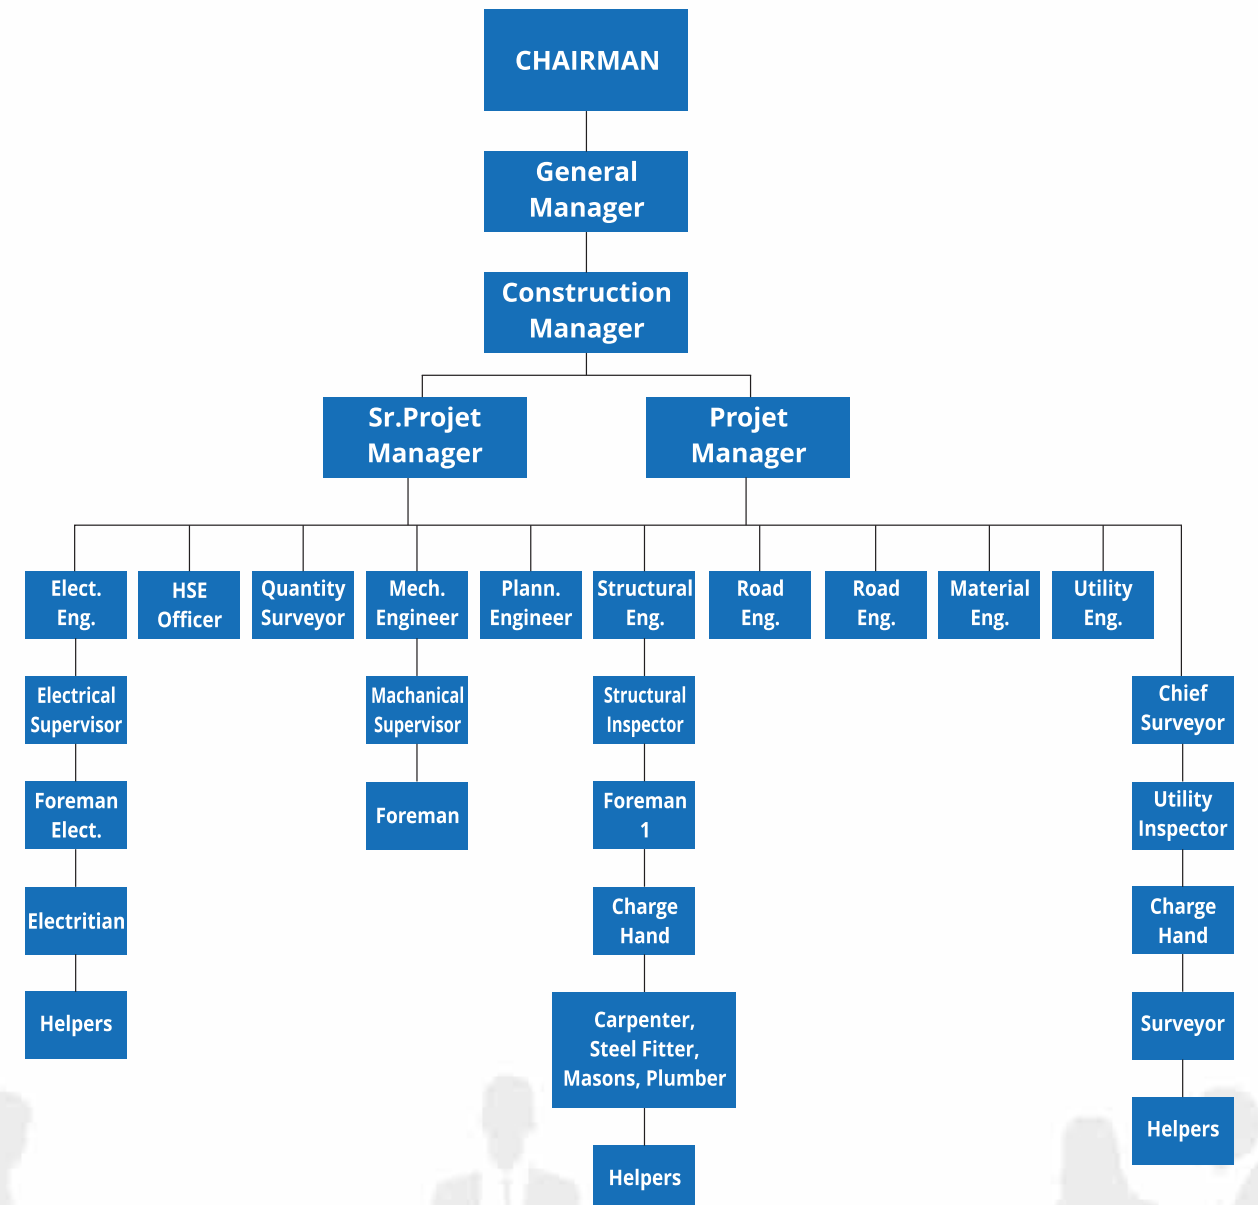

Mission

- To strengthen the future, ensuring increased return to associates
- To be a leading Trading and Contracting firm in the global market.
- To become the customer's most preferred choice by attaining excellence in quality and timely completion value added projects.
- To continually innovate, develop and adopt state-of-the-art technology in method and materials to enhance productivity and cost effectiveness.
- To continually improve the competence of our people and make them proud to work .
- To built a safety culture aimed at continually reducing the frequency severity rate towards achieving zero accidents.
- To contribute to the development of the local community and society at large as a part of our corporate social responsibility
